BELT SIZE CHART

BELT SIZE (EURO)	WAIST CIRCUMFERENCE (CM)	WAIST CIRCUMFERENCE (INCH)
75	90	30
80	95	32
85	100	34
90	105	36
95	110	38
100	115	40
105	120	42
110	125	44
115	130	46
120	135	48

MEASURING YOUR WAIST

1. Use a clothing measurement tape or a non-elastic string and wrap it across the circumference of your waist in where you wear your pants either above or below your waist area.
2. Mark and read the reading either in centimeter or inches where the tape intersects each other. Our general recommendation is that you provide allowances for the thickness of your pants or jeans as well as the movement of your body during daily activities.
3. Generally, add an additional 1-2cm to the overall length to provide a comfortable size to determine the final size. When in doubt, always go for one size bigger that will allow us to punch additional holes.

GENERAL SIZE RECOMMENDATION

1. Your belt comes pre-punched with 3 holes, you may also request for more holes to be crafted in the front should you have a smaller waist or at the back if you worry about a bigger size. Additional holes certainly do not affect the beauty and appearance of the belt.
2. Generally, when you select the appropriate size according to the size chart above, the belt should sit on the first hole leaving an additional 2 belt holes to allow for increases in size. You may also approach any Authorized retailers or Boutique to assist in adding new belt holes.
